

Inventory Management News You Can Use

Published 5/17/2011

Ammunition Information Notice 053-2011, Serialized Class V(W) Materiel Expenditure Reporting, was released on dtg 251935Z Apr 11. This AIN provides updated instructions for the guidance and reporting procedures for serialized Class V(W) materiel. Of particular note, is the elimination of the requirement to submit Naval messages for serialized expenditures. Refer to the AIN for the complete update on reporting guidance and exceptions.

The Inventory Management Team will be hosting an inventory manager's and inventory accuracy conference during July 2011. Invited participants are personnel involved in day-to-day OIS-R inventory actions, the PICP, and MIRR inventory accuracy and review processes. The intent of this conference will be to provide informational briefs from specific functional areas, discuss current processes, and draft a set of standard processes and policies that would formalize the ICP-to-retail linkage and create supporting efficiencies that our Marine operating forces deserve.
